The Suntelia Cycle of 6,480 Years

In the year 2012 (sign of Aquarius), many spoke of the winter solstice alignment of the earth with the galactic center of the Milky Way. The same alignment occurs every 6,480 years, a quarter round of the Precession of the Equinoxes of 25,920 years; the time it takes all twelve signs of the zodiac to make one complete revolution around our earth. Myth and history reveals that each Suntelia cycle alignment has been tied to cataclysmic change on the earth, *destruction (judgment)* followed by a rebuilding period (*creation*), and apparently in connection with great wickedness on earth. This may be one reason why the Mayans predicted coming trouble in 2012. (Note that the number 6480 reduces down to 9, the number tied to judgment then creation.) The *Suntelia* alignment (below) features an archer (the centaur in the constellation Sagittarius) aiming his arrow at the head of a great serpent or sea monster - the *Ouroboros* of ancient cultures, also called *Leviathan* in scripture. It is visible for just a few days every 6,480 years, the sun also rising out of the serpent's mouth. In ancient Egyptian zodiacs, the half man - half horse *centaur* of Sagittarius is depicted with wings (a tie to heavenly powers). With his bow and arrow he overcomes the serpent (Satan in scripture).

The head ingesting the tail (added above) aligns with the rising sun in this area on the winter solstice every 6480 years.

This cyclical period is known as a "Suntelia." The Ouroboros, also known as Leviathan in the Bible, is our Milky Way Galaxy. Anciently the earth was pictured as the primordial mound rising up amidst the Milky Way's great sea of blue stars. It occurred in 2012, signaling coming judgment (destruction) with rebuilding (creation) thereafter in the Millennium.

Ouroboros - Leviathan - Milky Way

Anciently the Ouroboros, Leviathan, or Serpent was connected to the Milky Way encircling earth. A portion of it looks like a serpent's mouth eating its own tail. The earth and our solar system is 2/3rd's of the way out of one of the spiraling arms of the Milky Way, some 30,000 miles from its galactic center. There are approx. 300 billion stars in the Milky Way galaxy. The Ouroboros is an ancient symbol for the circle of time tied specifically to the Precession of the Equinoxes (also called "the Great Year" or "the Platonic Year"). The Suntelia cycle is one quarter of this time or 6,480 years (25,920 divided by 4 = 6,480).

In scripture "*Leviathan*" is the mythical sea monster surrounding the earth (see Isa. 27:1, 51:9-10; Job 41:1; Psalm 89:8-10, 104:26). The earth was compared to a primordial mound rising up at the center of the blue sea of stars surrounding us - the Milky Way. In other places in scripture, *Leviathan* is tied to the serpent Satan, and often in association with the word "*Rehab*". This Hebrew word is tied to the concepts of "pride, rage, fierceness, and insolence". *Rehab* is also associated with "*Egypt*", the nation once holding Israel captive. Israel was freed in the divided waters of the Red Sea by the sent deliverer Moses (see Isa. 51:9-11, 63:9, 12).

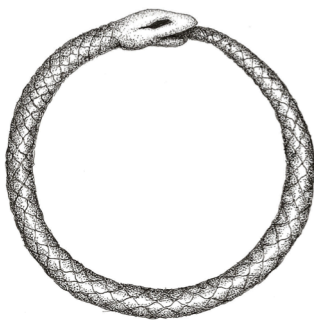

The *Suntelia* of 2012 is a marker for a coming time of great upheaval, when the serpent has significant negative influence upon the earth once again, necessitating another judgment and deliverer (sent servant) prior to the Lord's return. According to Isaiah 51:9-10, "*the Arm of the Lord*" delivers the righteous in the last-days by finally defeating *Rehab* or *Leviathan*, the great serpent inspiring worldly leaders to make war on the Lord's people (see also Ex. 14:21; D&C 61:14 & 133:53). There, the Davidic Servant is told, "Awake, awake, put on strength, O arm of the Lord; awake, as in the ancient days, in the generations of old. Art thou not it that hath cut *Rehab*, and wounded the dragon? Art thou not it

which hath dried the sea, the waters of the great deep; that hath made the depths of the sea a way for the ransomed to pass over? Therefore the redeemed of the Lord shall return, and come with singing unto Zion..." (see also Exodus 14:21, D&C 61:14, and 133:53).

The previous Suntletia is thought to have occurred when the Tower of Babel was destroyed, perhaps 4468 BC (sign of Taurus). Coinciding with it civilizations who were forced to start anew, speaking different languages. Previous Suntletia cycles before it were in 10,948 BC (sign of Leo), 17,428 BC (Scorpio), and 23,908 BC (which is 25,920 years ago - one complete Precession of the Equinoxes cycle). Four Suntletia cycles may coincide with the four cornerstone or pillar constellations; *Taurus* (bull or ox), *Leo* (lion), *Scorpio* (eagle / serpent), and *Aquarius* (man - the water bearer). They are tied to the four Cherubim surrounding God's throne in Revelation and Ezekiel in association with a *bull*, *lion*, *eagle*, and a *man*. Anciently special guardians at the entrances to temples often featured Cherubim that were a composite of the hind parts of a *bull*, the fore parts of a *lion*, the wings of an *eagle*, and the face of a *man* (see Ezekiel 1:10). They are each tied to various roles of Christ (as are all Twelve constellation signs).

The Seventh Seal John the Revelator addressed the "seventh seal" bringing in the new Millennium. It appears to follow the 2012 Suntletia, which marks a coming cataclysmic event, one addressed by Isaiah, John, and Daniel - the "tribulation" and "judgment" of the Biblical last-days. John is the fifth angel of D&C 77:8-15, who in association with *four great angels* will "save life and destroy" in the last-days during the "judgment" period, a 3.5-year period at the start of the new Millennium. We are approaching these events, the fulfillment of prophecies in Revelation, Isaiah, and Daniel.

How Old is the Milky Galaxy - the Oruoborus?

Early Mishnah era Rabbis believed that God created and destroyed many worlds previous to creating our present earth. They understood that *yom* or "day" in Genesis was not necessarily a 24-hour period, but an era of time, specifically a 1000 year period (see Psalm 90:4; 2 Pet. 3:8; D&C 77:7A; Facsimile 2, #1). Rabbi Aryeh Kaplan quoted Rabbi Yitzchak of Akko, a student of Maimonides, concluding from the Zohar that the first creation was 15.8 billion years ago. This is very close to the scientific estimate that the expansion of the universe began, some 15 billion years ago. Multiplying 7000 of the Lord's "divine" years (at 1000 years each, or 7000 x 365,000), equals 2,555,000,000 years (or 2,520,000,000 years, using 360-day years). If we assume that the 7th cycle began with the Biblical account in Genesis, the Creation of our world may have occurred when our universe was approx. 15,340,500,000 years old.

In an 1844 letter to the Prophet Joseph Smith's brother, William W. Phelps (the Prophet's scribe) stated, "...eternity, agreeably to the records found in the catacombs of Egypt, has been going on in this [solar] system almost two thousand five hundred and fifty five millions of years..." (or 2.5 billion years). For more on the Suntletia cycle, see David Flynn, Cydonia, Defense Publishing.
